

LIFESIZE SHARE™

Wireless screen sharing and room automation platform

Create and automate connected meeting spaces.

Add useful tools to your meeting spaces — not overwhelming complexity. Lifesize Share brings a range of connected technologies together seamlessly, so that your meetings start on time, your presentations run smoothly, and you capture the attention of everyone in your audience.

- Multipurpose media hub that makes it easier to enter any room and work, meet, communicate and collaborate
- Streamlined user experience for simplified device management and automation of multi-functional meeting spaces
- Share multimedia content to any screen, with fast, simple setup and secure, separate wireless connectivity
- Save valuable time and resources integrating and switching between connected systems and software

Multiple applications. One seamless experience.

Wireless screen sharing

Eliminate the complexity and clutter of cords, wires and dongles from your meeting room. Share your laptop screen, play full-motion video and even drive a presentation right from your mobile phone.

Digital Signage

Transform screens of all sizes into dynamic, automated content displays to share meeting room schedules, company news, social media feeds and more with any audience, anywhere in your office.

Whiteboard Collaboration

Bring the creativity and flexibility of whiteboarding to your video conferencing experience, capturing whiteboard content safely, securely, and in real time to share with meeting participants.

Join from Mobile

Leverage wireless beacon technology to launch Lifesize Icon room systems remotely and join meetings from your recognized mobile phone with a single touch.

Lifesize Share™

SYSTEM COMPONENTS

- Lifesize Share device
